

Chariot Audio Kit

The Asset Aware audio kit acts as an ear to the vehicular cabin. This hands-free device is designed to wire directly into the Chariot GPS tracking device harness cable. The device can be programmed so that the microphone activates on certain movements or sounds from the cabin.

full duplex

Simultaneous two-way voice transmission where both parties can talk at once.

one sim card

Multiple mobile devices utilising the one sim card.

safer driving

The hands-free, auto-answering and auto-dialling features ensure driver safety.

KEY FEATURES INCLUDE:

- Auto-answering and auto dialling modes
- Cabin monitoring
- Full duplex voice connectivity via microphone and speaker
