

Harpoon

This miniature device boasts the same features of the Trident and Javelin – but in tiny-form. Perfect for mounting to small assets and easy to conceal. The Harpoon is a compact, battery powered, IP67 tracking device that is ideal for mounting onto small assets or using in a concealed location. The 4G Cat-M1/ NB-IoT Modem allows for very-low power operation and will last up to 3 years on once daily updates.

rugged & weatherproof

Compact IP67 rated housing that is UV stable.
Dimensions: L 85 x W 63 x H 24mm.

flash memory

Enough memory to store over 25,000 records.

recovery mode

Can be remotely switched into recovery mode to do live tracking and reporting.
